

Innovation
that excites

NISSAN PATROL

~~WE MAKE PROMISES.~~ WE KEEP PROMISES.

INTRODUCING NISSAN ASSURED, IT'S MORE THAN A PROMISE. AS PART OF THE NISSAN FAMILY YOU'RE GUARANTEED OUR COMMITMENT TO CUSTOMER CARE. A LASTING BOND BETWEEN YOU, YOUR VEHICLE AND THE NISSAN BRAND. THAT'S OUR PROMISE.

CUSTOMER EXPERIENCE

We promise to make your Nissan experience one to cherish, from your delivery day and everyday after, our commitment is to deliver a service experience you can trust – and believe in.

CUSTOMER SUPPORT ROADSIDE ASSISTANCE

We keep you on the road 24/7. Should anything unexpected happen we guarantee you 24-hour roadside assistance, no matter the age of your Nissan, because it's still a Nissan. Just call **0800 NISSAN (64 77 26)** anywhere, anytime. Terms and Conditions do apply.

LICENCE RENEWAL REMINDER

We'll remind you in advance so you can keep your licence disk up to date.

3 YEAR OR 90 000KM SERVICE PLAN

For the first 3 years or 90 000km of driving your car, whichever comes first, you can rest easy knowing that our promise to you is a kept one. We'll make sure your car is running smoothly and always on the road.

6 YEAR OR 150 000KM WARRANTY

As long as your car is under our warranty, we'll always have you covered if anything goes wrong. You don't need to stress for the first 6 years or 150 000km, whichever comes first.

SERVICE AND REPAIRS FREE VEHICLE HEALTH CHECK

We'll give your car a free health check on every major and minor service prior to any work being carried out, so you know exactly what needs to be done, and how much it will cost.

COMPETITIVELY PRICED PARTS

We deliver the highest care for your Nissan by fitting only Nissan Genuine Parts. The expertise of our Nissan trained teams will also guarantee best value-for-money by finding the most competitively priced part for your local dealer.

COURTESY CAR

We will arrange a courtesy car for all warranty repairs should the components required not be available within 48 hours.

NISSAN ASSURED

More than a Promise

THE LIVING LEGACY.
GO ANYWHERE, ANYTIME.

Building on the impressive achievements of the first generation was the soft-top Nissan PATROL 60 series or G60. This three-door, four-seat model was first sold in Australia in 1960 and was with short-, medium- and long- wheelbase chassis. It has a 3956cc petrol engine, four-speed manual gearbox and leaf-springs all-around.

The second generation Nissan PATROL captured the imagination of the Australian market when it became the first vehicle to cross the treacherous Simpson Desert. This daunting desert covers an area of 176 500sq km and contains the longest parallel sand dunes in the world, some of which are over 40m high.

1960–1980

SECOND GENERATION

G60

The Y60 Nissan PATROL, was introduced to the world in 1987, and was radically different from its predecessors. It had coil-spring suspension and the rear axle was on a 5 link setup which considerably improved the Nissan PATROL'S on-road handling, whilst still retaining its unmatched and legendary off-road performance. This model also had a five-speed transmission and all-round disc brakes. Some Y60s even featured a PTO-driven front mounted winch.

As a result of its superb wheel articulation (making it the perfect vehicle for rock-crawling) combined with the ease with which parts can be replaced out in the field, it is still being manufactured for military purposes in Asia and the Middle East.

1987–1997

FOURTH GENERATION

Y60

In 2004 the significantly face-lifted Nissan PATROL Y61 was released. It boasted new headlights, box flares on each guard, larger tail lights and an extra 40ℓ fuel tank and could seat up to ten people. Nissan also made a two-door pickup version of the Y61 series available as a bare chassis and cab. The Y61 series is still a favourite amongst off-road enthusiasts.

Thanks to the Nissan PATROL Y61's dependability and superior 4X4 capabilities, it was selected for the Miles Ahead Expedition into Africa undertaken by Barclays Bank in 2005. This voyage saw the Nissan PATROL team covering 17 countries in total, and some of the world's most inhospitable terrain in only 157 days.

2004 – 2010

SIXTH GENERATION

Y61 FACELIFT

FIRST GENERATION

4W60

1951–1960

The Nissan PATROL legacy began in 1951 with the 4W60. It had an authentic 4X4 chassis, selectable 4WD and a powerful 6-cylinder engine. The 4W60 quickly proved to be the most reliable, rugged and downright versatile 4X4 available, and it was not long before it became the preferred mode of off-road transportation in many parts of Asia.

The first generation Nissan PATROL went through many changes as Nissan made constant improvements to the engine and look of the vehicle. The 4W65, which was introduced in October 1958, was the first to boast a Nissan badge on the grille and PATROL badge. The 4W73, which was launched in 1959, marked the end of the impressive first generation.

THIRD GENERATION

160 SERIES

1980–1987

Next in line was the Nissan PATROL 160 series, which was launched in 1980. With a five-door layout and seating for seven people, the 160 was the ultimate family adventure vehicle of the 80's. Air conditioning and power steering were big and welcomed improvements and some versions also featured Limited Slip Differentials (LSD), which further improved off-road handling.

The 160 series quickly came to be loved and respected for its uncompromising quality and strength, and these are still a common sight in challenging terrains everywhere. The third generation Nissan PATROL'S reputation was further strengthened by winning first place in the Paris-Dakar Rally in 1984 and second place in 1985 in the Production Diesel class.

FIFTH GENERATION

Y61

1997–2004

When the Y61 hit the market in 1997 it was clear that Nissan not only stayed true to the traditions of the original Nissan PATROL but surpassed it. Its underbody hardware was so significantly strengthened that it is still considered to be the strongest components fitted to any production 4WD.

Technological developments included an automatic gearbox, electric windows and mirrors plus the fitment of a chilled cooler box between the front seats. Nissan also added a host of safety features including all-round ABS for the fully ventilated disc brakes, powerful Halogen headlamps and a reinforced cabin structure with side impact beams. This remarkable 4x4 came third in the 2003 FIA cross-country Rally World cup in the T1 class and won the 2004 Dakar Rally in the T1 class.

SEVENTH GENERATION

Y62

2010–2017

The 7th generation Patrol, the Y62, was launched in 2010 globally. New from the ground up, and mechanically superior from previous Patrols, it introduced Nissan's state-of-the-art Hydraulic Body Motion Control (HBMC) suspension system. Along with a VK56VD 5.6 litre V8 engine, intuitive technology, an imposing new front design and interior refinement, the New Nissan Patrol took sophistication and capability to a whole new level.

In 2013 a World Guinness record was achieved by a Nissan Patrol pulling a 170 ton cargo plane. In 2014 a significant facelift was followed in 2015 with a record for fastest ascension of a 100m sand dune. The daunting 49 degrees slope was conquered in a time of 4.9 seconds, with the help of Intelligent Hill Start Assist (HAS) and Hydraulic Body Motion Control (HBMC) System.

SEVENTH GENERATION

Y62

THE NEW NISSAN PATROL. THINK BIG.

In South Africa, the 2017 launch of New Patrol brings a suite technological features under Nissan's Intelligent Mobility technologies, and firmly retains the Patrol's reputation as the most technologically advanced SUV in its class. The Nissan PATROL takes proven performance, versatility and reliability and ups the ante with superbly sophisticated styling and superior comfort and a host of advanced technologies and safety features.

Over more than six decades, the Nissan PATROL has built and consolidated its reputation for being "King of the Off-Road" throughout Africa's unforgiving landscape. Pair this with superior handling on-road, now the Nissan PATROL elevates that coveted reputation even further.

THINK BIG. THINK LUXURY. THINK TECHNOLOGY.

NEW GENERATION NISSAN PATROL REDEFINES THE STANDARDS OF COMFORT WITH SOPHISTICATED TECHNOLOGIES.

By combining functionality, versatility and powerful performance with an attractive design, superior styling and refinement, the Nissan PATROL takes sophistication and capability to a whole new level. Nissan PATROL offers the discerning motorist modern lines, innovative safety features, highly advanced intelligent technologies, supreme comfort and more.

The impressive exterior of the Nissan PATROL shields an interior that offers nothing short of first class comfort and style. The designers of the Nissan PATROL have paid significant attention to every detail. Large panelled wooden areas, chrome finishes and soft touch leather gives this vehicle a status of sophistication.

THINK BIGGER THAN JUST OFF-ROAD.

WHATEVER TERRAIN NATURE THROWS AT YOU, NISSAN PATROL'S
ADVANCED INTELLIGENCE ENSURES A FIRM GRIP AT ALL TIMES.

INTELLIGENT 4X4

Utilising advanced electronics to ensure that no matter how severe the driving conditions, the Nissan PATROL will grip the road at all times, transferring drive between wheels and axles. Effortlessly switch between four drive modes; sand, on-road, snow and rock with just a flick of a switch.

HILL START ASSIST

Break pressure is applied 2 seconds after releasing the pedal to avoid any roll back before moving forward. Feel secure on a slope particularly in sandy or gravel conditions.

HILL DESCENT CONTROL

The Nissan PATROL assists the driver down a steep or slippery slope at a constant slow speed without the need for braking, enabling the driver to concentrate on handling the vehicle.

RAW POWER THAT PUTS YOU AHEAD OF THE PACK.

From the very beginning, the Nissan PATROL has been synonymous with power. Each new model has employed advanced technologies that enhance both on and off-road performance to unsurpassable levels. The latest generation Nissan PATROL is no exception.

5.6l V8 engine offers the ultimate power trip. Variable Valve Event and Lift (VVEL) and Direct Injection Gasoline (DIG) technologies improve efficiency, power and torque with lower emissions. The 7-speed VVEL automatic transmission with manual mode, delivers seamless acceleration with 298kW of power and 569Nm of torque.

POWER	TORQUE	AUTO TRANSMISSION
298.4kW	569Nm	7-SPD

FIRST-CLASS LEVELS OF COMFORT.

Every journey in the Nissan PATROL is more enjoyable than the previous one.

In keeping with the Nissan PATROL'S mission to deliver more comfort and more room, the Nissan PATROL offers versatile luxury leather seat dimensions that outclass the competition. Voluminous cushions for enhanced comfort on 3 rows of more-luxurious-than-ever seating, while the lavish space around the 2nd row seats is reminiscent of a private jet, the 3rd row seats offer unprecedented comfort thanks to the new reclining and sliding mechanism.

The possible 8 different seating/cargo configurations in the 1st, 2nd and 3rd row create the biggest rear luggage space in its class with the ultimate comfort.

**ENHANCED INTERIOR COMFORT
AND LUXURY FOR THE WHOLE FAMILY.**

SOPHISTICATED INTERIOR REFINEMENT.

A fresh and modern design approach underpinned the creation of the formidable exterior. From the high-tech image of the front head lamps to the dynamic rear end sporting combination lamps, each exterior element on the Nissan PATROL is a statement in luxury. The bold window graphic of the blackened A pillar, alloy wheels, as well as the new angle strut grille all contribute to the vehicle's formidable on-road presence. Chrome finishes on the air intake vents and window frames express dignity and grace. The integrated protective bumper has been designed with perfect approach angle to allow this off-road stalwart to go anywhere.

INTERIOR SPACE

The Nissan PATROL offers the largest interior space in its class. Legroom has increased due to the longer wheelbase, and expansive luggage space is created in seconds through the easy seat folding operation. A built-in cooler box, that incorporates a double hinged design to enable access from both the first and second row seats, has capacity for six 500ml drinking bottles.

QUIET CABIN

In comparison to normal glass, the laminated windshield and front windows reduce noise by 35% in the Nissan PATROL. Ultra micro-fibre insulation, called thinsulate, in the front door panel and luggage areas, provides advanced insulation to maintain the cabin temperature and a quieter cabin.

TEMPERATURE CONTROL

The Nissan PATROL's air conditioning system features curtain vents mounted in the ceiling above each side window and upper vents mounted above the windshield. A strong current of cool air forms a curtain of air that acts as a barrier to heat penetrating the vehicle. Dual Zone climate control allows front and rear passengers to personally set the air conditioning to different levels.

THE PERFECT BALANCE BETWEEN LUXURY AND TECHNOLOGY.

The Nissan PATROL technologies are practical, useful and indulgent. Enjoy home LCD quality on the two 8" WVGA monitors for second row passengers with two headphones and a remote control. The 8" WVGA navigation display monitor on the sizable instrument panel in the front of the vehicle offers superb clarity. The three monitors display three different screens, connecting to the various sources of music, video and entertainment, such as the DVD, iPod and game player.

SECOND ROW SCREENS

A 8" multi-screen entertainment system with headsets and a remote control will keep all second row passengers firmly glued to their seats.

8-INCH SCREEN

See it all with the 8" Wide Video Graphic Array (WVGA) centre display.

BLUETOOTH®

Stay connected with Bluetooth® capabilities in the Nissan PATROL. Radio AM/FM, CD/MP3 player with 2GB HDD music box, Bluetooth, USB and iPod connectivity.

INSTRUMENT PANEL

The fine vision instrument display provides all of the driver's information needs in a stylish way.

DRIVE MORE LIKE A PRO

ARMED WITH AN ARRAY OF INGENUOUS TECHNOLOGIES,
THE NISSAN PATROL MAKES EVERY TRIP A PLEASURE.

Smart technology like the innovative Intelligent Blind Spot Warning and Intelligent Blind Spot Intervention system detects vehicles in your blind spot and alerts you via an audible alarm. If, for instance you continue to change lanes and the car in your blind spot also continues to proceed, the system will initiate, gently braking one side of the vehicle, bringing your vehicle back to your original lane position, well out of harm's way.

In the Nissan PATROL, you'll feel at ease with Intelligent Forward Collision Warning. Using a front distance sensor, it will detect the risk of a forward collision and prompt the driver to brake with an alarm. When the system judges that a collision cannot be prevented, Intelligent Emergency Braking is activated to help the driver reduce the rear-end collision speed by applying the brakes.

Intelligent Lane Departure Warning sounds an audible warning when the driver starts to drift out of its lane. Intelligent Lane Intervention detects that you are still straying from your lane, it will engage and gently guide you back.

Vehicle Dynamic Control automatically prevents the vehicle from sliding sideways on slippery road surfaces when changing lanes or negotiating a curve.

NISSAN  INTELLIGENT MOBILITY

GET A HAND WHEN YOU WANT IT.

TRAVELLING OUR ROADS PRESENTS A DIVERSE RANGE OF CHALLENGING LANDSCAPES AND THE NISSAN PATROL IS WELL EQUIPPED TO TACKLE ANY TERRAIN THANKS TO ITS TECHNOLOGY, DESIGN AND FORETHOUGHT.

Intelligent Ride Control system offers 4-wheel independent suspension. Working with the chassis and body frame the system maximises the suspension stroke on off-road running and prevents roll angle, to maintain flat riding with high damping force at cornering. The HBMC system gives the Nissan PATROL superb stability on rugged and sandy terrain, while also delivering a comfortable ride in the city.

Helical Limited Slip Differential (LSD) and Rear Differential Lock allows the driver to maintain momentum, even on slippery slopes or roads when a wheel is spinning or slipping.

Active Brake Limited Slip (ABLS) is a traction control mechanism that uses sensors from the Anti-lock Braking System (ABS) to transfer power from a slipping wheel to a wheel with more traction.

Off-Road Monitor function offers information to support off road driving tyre conditions, while the Intelligent Tyre Pressure Monitoring System (TPMS) with tyre inflation indicator provides visual and audible signals outside the vehicle for inflating the tyres to the recommended pressure.

Intelligent Cruise Control helps make driving less tiring on long trips. A simple touch of a button activates the cruise control and allows you to set the desired cruising speed. Using radar to maintain a set speed and distance between you and the vehicle in front of you, even braking to maintain the distance.

Nissan Intelligent Key allows for just the press of a button on the door handle or trunk to unlock them, while the keys remain in the pocket or purse. With the standard Push Start Button feature the vehicle is ready to go with just a push of the button. This technology also memorises the driver's seat position and for added safety the engine immobiliser prevents anyone without the key from starting the car.

SENSE MORE AROUND YOU.

MORE SENSITIVITY THAN YOU'D IMAGINE IN SUCH A POWERFUL VEHICLE, NISSAN PATROL IS 100% AWARE OF YOUR SURROUNDINGS AT ALL TIMES.

ADVANCED DRIVE ASSIST DISPLAY.

Colour monitor which displays front and rear power ratios, the trip computer and fuel economy & external temperature.

INTELLIGENT AROUND-VIEW MONITOR

Leaving nothing to chance, the Nissan PATROL range comes with Intelligent Around-View Monitor allowing drivers to get in and out of tight spots with ease by providing a simulated bird's eye view directly on screen. Intelligent AVM gives you a virtual 360° bird's eye view of your vehicle to bring your parking space and manoeuvring capabilities into full perspective.

SMART REAR-VIEW MIRROR

A built-in LCD monitor, displaying images from a camera mounted on the rear of the Nissan PATROL, providing an unobstructed view.

THE VEHICLE THAT PROTECTS YOU.

MAINTAIN COMFORTABLE DRIVING CONDITION

In the event of potential risk, Nissan technologies make it easier for the driver to maintain safe driving conditions. Some of these innovations reduce the driver's burden, while others enhance visibility and awareness of the immediate surroundings, at night and when parking.

RECOVER FROM DANGEROUS CONDITIONS TO SAFE DRIVING

When a risk appears, warnings and automatic countermeasures help the driver recover from dangerous driving conditions to avoid the risk and resume safe driving.

MINIMIZE DAMAGE WHEN A COLLISION IS UNAVOIDABLE

In cases where a collision cannot be avoided, the inherent Nissan technology deploys to minimise damage, and more importantly help reduce injuries by activating the brakes, restraining passengers, and applying other measures.

Intelligent Around-View Monitor

The Intelligent Around-View Monitor uses four cameras to display a bird's eye view of the vehicle to assist with parking even in tight spots.

Elevated Cockpit

The elevated cockpit area is made possible by the ground clearance of 283mm to ensure optimal visibility at any weather and road conditions.

Xenon headlamps

Ensures bright and consistent illumination of the road which increases comfort and reduces fatigue when driving when dark.

SAFETY SHIELD

SAFETY SHIELD

In the commitment to "Real World Safety", Nissan pursues innovation as part of its Safety Shield concept. Based on the idea that cars should help protect people, advanced, proactive safety technologies help driver and passengers to avoid danger and injury in a wide range of circumstances.

NISSAN INTELLIGENT MOBILITY

Vehicle Dynamic Control

Automatically prevents the vehicle from sliding sideways on slippery road surfaces when changing lanes or negotiating a curve.

ABS and EBD

The Anti-lock Braking System (ABS) helps prevent skidding during emergency braking, while Electronic Brake force Distribution (EBD) optimises brake force according to payload.

Intelligent Brake Assist

Enhances full braking performance in emergency situations, with its high quality anti-fading performance brake, the Nissan PATROL incorporates intelligent Brake Assist (BA) technology.

Zone body construction

Enhances cabin safety by combining impact-absorbing "crushable zones" with a high-strength "occupant zone" to protect passengers.

Front Seat Belt Pre-tensioners and Load Limiters

Seat belt pre-tensioners on front seat belts automatically tighten the seat belts in certain frontal collisions, while load limiters are designed to give a little, to absorb belt-force load transmitted to front occupants.

Active Head Restraints

In certain rear-end collisions, front seat active head restraints move upward and forward to help cushion the head, and to reduce whiplash-type injuries.

6-SRS Airbag System

The 6-SRS Airbag System in the Nissan PATROL comes equipped with driver and front passenger airbags, front-seat mounted side airbags and roof-mounted curtain airbags to cushion its occupants in the event of a collision.

Crash-sensitive Door Unlock

On detecting a collision, the crash-sensitive door unlock function will automatically unlock to ensure free movement of the occupants.

Nissan's commitment to the environment

Nissan's environmental philosophy embraces people, vehicles and nature. In the pursuit of a sustainable mobile society, the Nissan Green Program aims to reduce the environmental impact of Nissan vehicles at every stage of the vehicle life cycle, while corporate activities address environmental challenges.

NISSAN'S commitment to quality: to provide all customers with a consistently high level of quality, Nissan applies the standard worldwide, to ensure that all Nissan owners enjoy peace of mind for the lives of their vehicles. The approach is based on quality from the customer's perspective on three key elements: 1. The expectation of a smooth driving experience with complete peace of mind. 2. The intangible appeal of a vehicle, its power to captivate and excite, with features that capture attention and imagination. 3. The level of attentiveness and service during the sales process, and long after the sale is concluded.

This data does not pertain to the specific vehicle and does not comprise part of the offer, but is supplied for the purpose of comparison between the various types of vehicles, in accordance with 1999/94/EC. Driving behaviour / conditions and other non-technical factors contribute towards a vehicle's fuel consumption and CO₂ emissions over and above the determined fuel efficiency of a vehicle.

NISSAN INTELLIGENT MOBILITY

Intelligent Mobility guides everything we do. We're using new technologies to transform cars from mere driving machines into partners. Together the journey is more confident, connected, and exciting. Whether it's cars that share the task of driving with you, or highways that change your EV as you go along. It's all in the very near future. And it's a future already taking shape in the Nissan you drive today.
